THE REPLY FILED 03 August 2007 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.							
1. The reply was filed after a final rejection, but prior to or on this application, applicant must timely file one of the follow places the application in condition for allowance; (2) a No a Request for Continued Examination (RCE) in compliance time periods:	ving replies: (1) an amendment, af tice of Appeal (with appeal fee) in the with 37 CFR 1.114. The reply m	fidavit, or other evider compliance with 37 C	rce, which FR 41.31; or (3)				
 a)	dvisory Action, or (2) the date set forth ater than SIX MONTHS from the mailin b). ONLY CHECK BOX (b) WHEN THI 06.07(f).	g date of the final rejecti E FIRST REPLY WAS F	on. ILED WITHIN				
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL							
 The Notice of Appeal was filed on A brief in comp filing the Notice of Appeal (37 CFR 41.37(a)), or any exter a Notice of Appeal has been filed, any reply must be filed AMENDMENTS 	nsion thereof (37 CFR 41.37(e)), to	avoid dismissal of th

Continuation of 11. NOTE: The reconsideration after final has been thoroughly studied by this examiner. However, it does not place the application for allowance after final action because:

Current parent Claim 1 and its dependent Claims 2-5 and 7-9 are not further amended at all, they are thereby still fundamentally covered by those arguments discussed in the final office action. However, the examiner has recognized at least three key points from pages 2-4 (particularly on Applicants' very GOOD summary of page 4 at top section) of Remarks regarding the advantage by using a preheated cabon fluoride filler.

First, the Examiner understands that Applicants' pre-heating on carbon fluoride filler may result at least somewhat better property such as improving composition' resistance to plasma treatment. Such an advantage may be very good to improve patentable weight in current 103 rejections.

Second, it will certainly take Examiner more search and reconsideratyion to be sure that heating the filler "before" the mixing of polymer and carbon fluoride filler is critical for final product performance in this case. In most cases of the art, heating at softing temperature of polymer will not damage or decompose the polymer, while the length of heating time may be more critical. Current Claim 1 does NOT disclose how long is the heating time at such a temperature. In the art, heating temperature may be NOT necessarily to be that high as long as its heating time is long enough.

Third, Applicants have presented several good arguments on page 4 at top section. As discussed earlier, each of four primary references is only silent about pre-heating carbon fluoride filler at the claimed high temperature such as 300 to 550 oC. However, it may be a routine and common practice such as the way by Lidorenko to "dry" each component including carbon fluoride filler before mixing into composition.

In summary, a new consideration and search is thereby required to be sure of all the above three questions being throughly answered.
